Versatile Erectomatic prevents wasted space between shelves.

### SAVINGS START THE MOMENT ASSEMBLY OF ERECTOMATIC STEEL SHELVING BEGINS

*Here's Why:* In timed tests, two assemblers took less than 11 minutes to completely set-up a closed Erectomatic unit 36" wide, 18" deep, 7'3" high. The same two men then tackled six competitive units of the same size. Assembly time on these six individual units ranged from 13½ minutes to 55 minutes each with the average time per unit being over 24 minutes—more than double the time required to assemble Erectomatic! These figures mean that two men can assemble nearly six Erectomatic units of this size in an hour, but only three, on the average, of ordinary units of the same size. Erectomatic's pre-planned space engineering is the reason for this economy in costly labor time. It's the first of several important savings when you select HALLOWELL Erectomatic.

**QUICK CHANGE** . . . shelves can be installed, changed, or removed in seconds without tools.

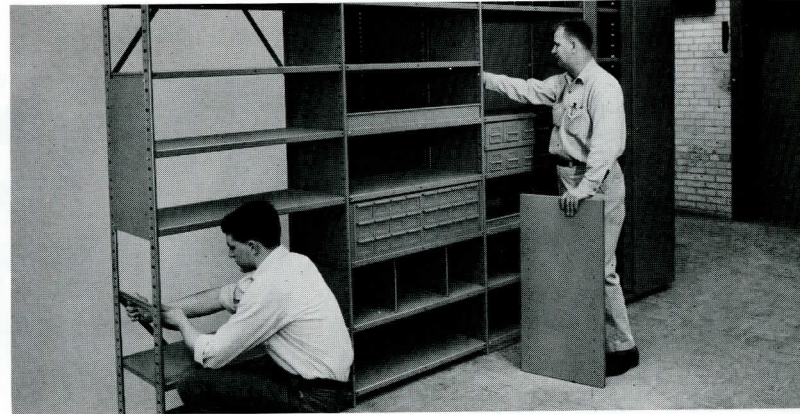

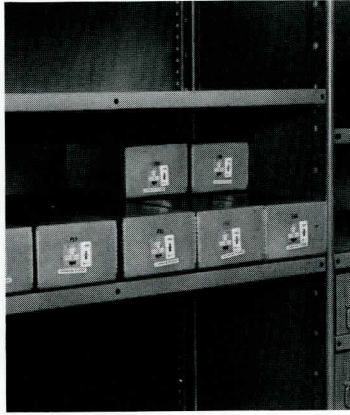

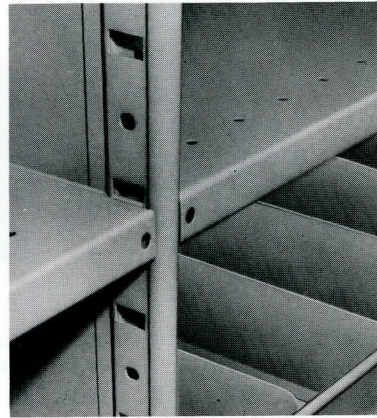

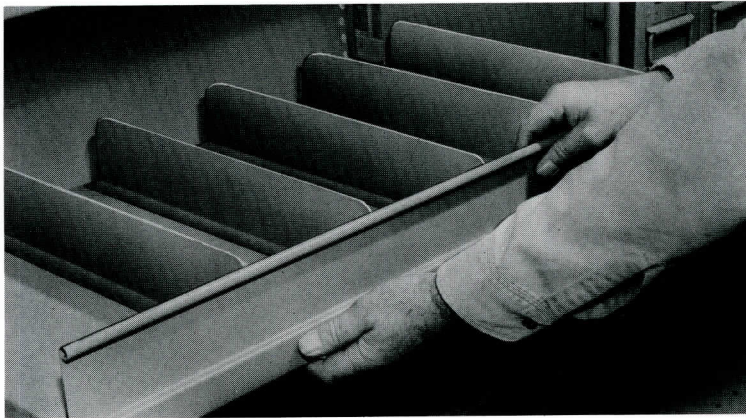

**1. FULL DEPTH SUPPORT** under both sides of shelf provides additional strength. Full width reinforcing channels can be positioned under shelf when heavy loads are required.

**2. SHELF SLIPS IN EASILY**, rests snugly on full depth supports. Four classes of shelf construction meet all load requirements.

**3. UNIQUE LOCKING DEVICE** holds shelf securely in place on full depth supports, ready for loading.

# ERECTOMATIC SHELVING goes up fast, cuts erection costs

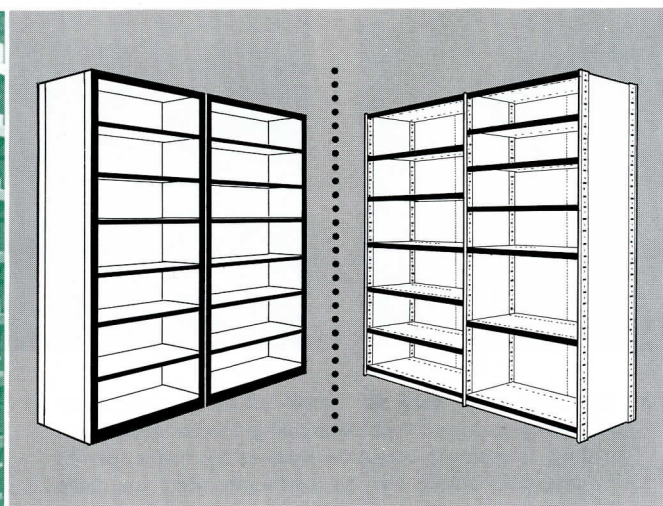

4. **STRAIGHT OUT AND IN SHELF CHANGE** does away with tilting, making it possible to change shelves without unloading. Integrated accessories such as bin fronts, partial dividers, label holder, etc., go right along when you make the change.
5. **INDEPENDENT SHELF POSITIONING** . . . each shelf is an independent unit which can be put in, slipped out and repositioned at any level without dismantling or disturbing other shelves or stored material in adjacent units.
6. **FULL USE OF SHELF AREA** in Erectomatic is due to space-saving beaded front posts, and the absence of angles and "T" type posts, which waste valuable storage space in ordinary shelving units.

7. **BEADED POSTS AND FLANGED SHELVES** prevent snagging of clothing or stored goods, protect workers.
8. **DOUBLE-DUTY SIDE PANELS AND POSTS** for continuous shelving . . . common side panel serving two sections. Besides speeding assembly, panels eliminate space-stealing overlapping panels on ordinary shelving units.
9. **LESS TIME, MORE UNITS UP PER HOUR**, quick shelf change and valuable floor space savings through the years are the net gains to HALLOWELL Erectomatic buyers.

**FUNCTIONAL SIMPLICITY** is key to speedy assembly of all Erectomatic shelving units. These 25 parts are total components of a 36 inches wide, 18 inches deep, 7 foot 3 inches high HALLOWELL Erectomatic closed type unit with seven shelves.

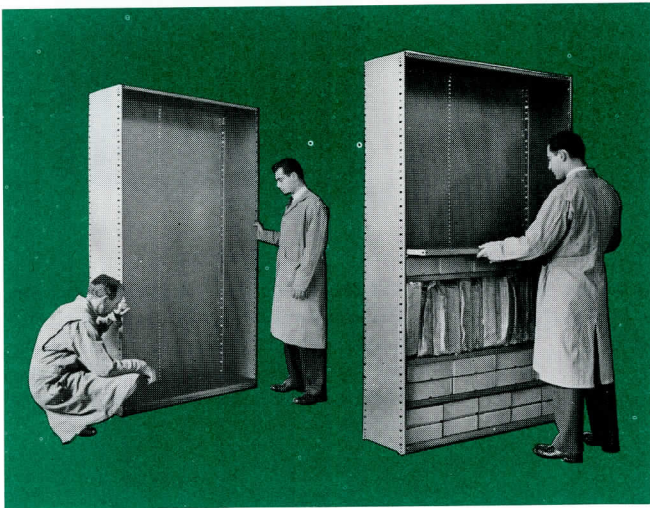

**ERECTOMATIC SHELVES** are not fastened to each other . . . can be positioned independently in a straight line or staggered according to individual loads. You can gain 20% or more storage space over ordinary steel shelving where shelves are fastened together at the same height.

## Savings continue for the life of HALLOWELL ERECTOMATIC units

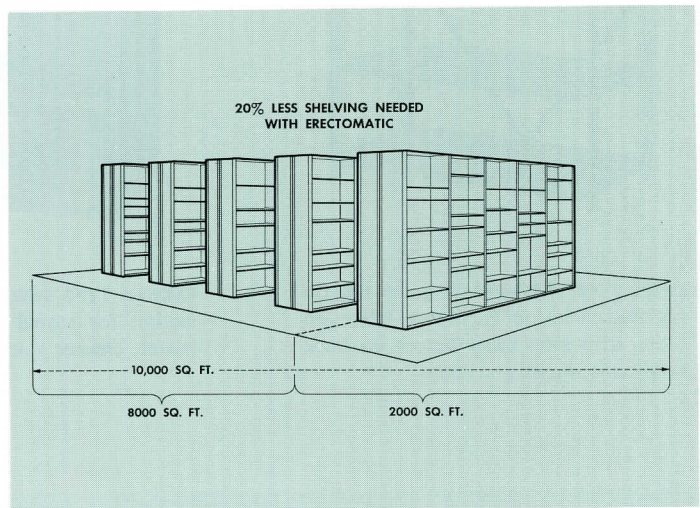

Erectomatic's functional quick change shelves, its unique and exclusive shelf-locking device, mean speedy initial shelf arrangement, repositioning when storage requirements change. A quick flick of the built-in locking devices on the shelf support and the shelf slides out easily and into its new position in a matter of seconds. Independent positioning allows shelves to be changed without tilting or disturbing other shelves or stored materials. This adds up to extra labor savings throughout the long life of your HALLOWELL Erectomatic units.

**SAVINGS START** as crew quickly connects back, sides, bottom and top of Erectomatic unit. Two men can assemble unit to this point in less than 8½ minutes. Later—as your needs require—your men can install shelves, reposition them in seconds to meet changing storage conditions.

## FLOOR SPACE SAVINGS start with installation, keep mounting over the years

Because shelf height can be readily adjusted to individual load height, Erectomatic shelving eliminates once and for all wasted “air space” between shelves so common in ordinary units. Erectomatic's beaded corner post construction permits full use of shelf width. There's no waste space due to angle or “T” posts. To you this can mean 20% or more storage space gained with HALLOWELL Erectomatic shelving. A 20% increase in shelving efficiency means 20% less floor space required for your shelving units, freeing this costly space for profit-making production. Whether you own, rent or plan to build a storage area, HALLOWELL Erectomatic units will continue to pay you annual space-saving dividends over the years.

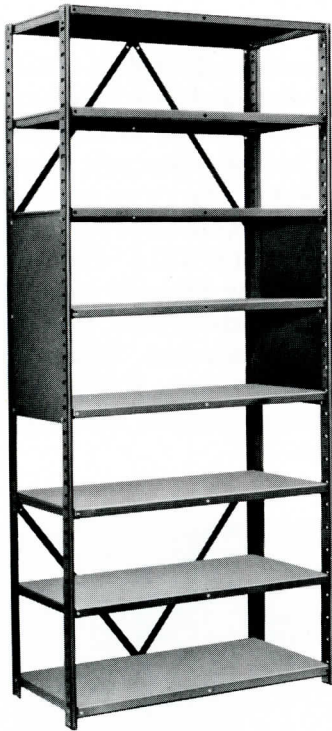

**LESS SHELVING IS NEEDED.** Because of the adjustability of Erectomatic, less shelving is required, which eliminates costly wasted space. This can mean that 8,000 sq. ft. of Erectomatic stores the same quantity of material as 10,000 sq. ft. of ordinary shelving. Twenty percent or more valuable floor space is free for production.

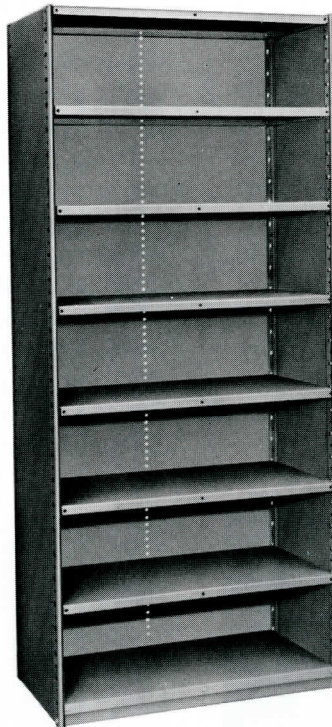

# HALLOWELL **ERECTOMATIC** SHELVING

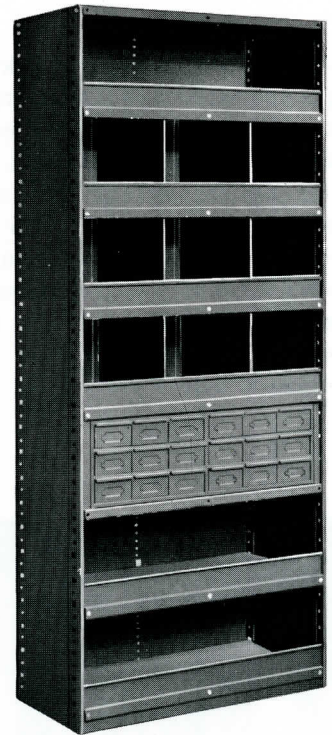

is available in these types:

**OPEN TYPE SHELVING** for goods that do not need enclosure. Panel sway braces on sides, strip steel sway braces on back keep units square and rigid.

**CLOSED TYPE SHELVING** provides protection for stored goods and permits neater, cleaner stock keeping.

**CLOSED TYPE SHELVING BIN UNITS** store miscellaneous items. Bin fronts, dividers and label holders fasten to shelves, need not be removed to re-position shelves. Shelf boxes and other accessories increase usefulness.

## HALLOWELL **ERECTOMATIC**® shelving is available in these sizes:

**OPEN TYPE**—5 models

**CLOSED TYPE**—5 models

**CLOSED TYPE BIN UNITS**—17 models

**LEDGE TYPE**—4 closed models and also 1 open model

Above types available in these sizes:

Widths (in.): 24, 30, 36, 42, 48

Depths (in.): 12, 15, 18, 24, 30, 36

Heights (ft., in.): 3:3, 4:3, 5:3, 6:3, 7:3  
8:3, 9:3, 10:3

**COUNTER TYPE**—1 model

Widths (in.): 24, 30, 36, 42, 48

Depths (in.): 18, 24, 30, 36

Heights (ft., in.): 3:3, incl. 3" base

**SHELVING CABINETS**—1 model with sliding doors;

1 model with swinging doors

Widths (in.): 24, 30, 36, 42, 48

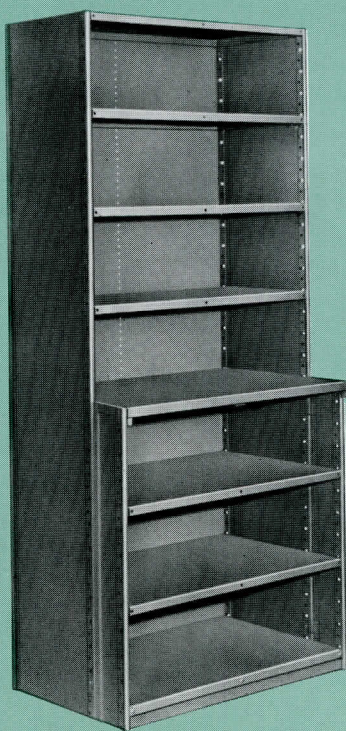

Depths (in.): 12, 15, 18, 24, 30, 36

Heights (ft., in.): 3:3, 4:3, 5:3, 6:3, 7:3

*All dimensions shown are nominal*

For Complete Information, see HALLOWELL **ERECTOMATIC** Shelving Catalog, Form 2257 Rev.

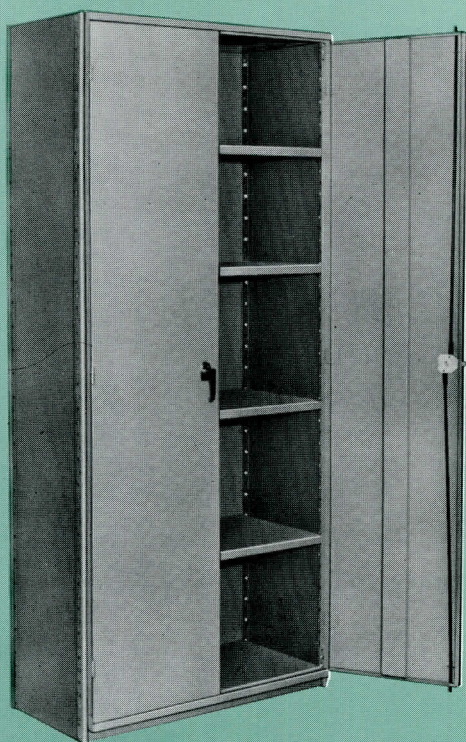

**LEDGE TYPE SHELVING** provides greater shelf capacity in lower compartments and working surface for entire width of shelving.

Whatever your storage needs, one or more of these functional and space-saving Erectomatic units holds your answer. Shelves feature a positive locking device which permits shelf changing almost as quickly as you can say "HALLOWELL Erectomatic Shelving means continuing storage economy." Maximum flexibility is at your finger-tips . . . minimum floor space is required when you buy Erectomatic for your shop. A call to your HALLOWELL distributor today starts you on the road to economy tomorrow.

**COUNTER TYPE SHELVING** Provides valuable storage space below a heavy gauge working surface.

**SHELVING CABINETS** can be ordered as complete units or made by adding swinging or sliding doors to closed type shelving. Equipped with cylinder door locks.
